## 9 Quality of signal at Subscriber location

We endeavour to deliver the signals to Subscriber location keeping the following technical parameters in mind.

S No.	Parameters	Value
1.	Maximum and Minimum Carrier Levels	47 dB $\mu$ V min. for 64 QAM 67 dB $\mu$ V max. for 64 QAM 54 dB $\mu$ V min. for 256 QAM 74 dB $\mu$ V max. for 256 QAM

2.	Signal to noise ratio	26 dB min for 64 QAM fall-off-the-cliff 32 dB min for 256 QAM fall-off- the-cliff.
3.	Operating Margin (Noise Margin)	Higher than 4 dB
4.	MER	30 dB (64 QAM) min. 34 dB (256 QAM) min.

These parameters are achieved by us on our trunk and distribution networks. Performance of these parameters can vary from each STB location so much so that it can be different at two locations within the same household due to the nature of the internal cabling within the household.

In such instances DIGICABLE's technician or its LCO's technician will demonstrate the same at the tap off /splitter level that feeds the particular household that the parameters are met and the subscriber will then have to replace the internal cabling at his/her cost.
